Please note the following:

- *Bid Pricing Option #4 was not awarded because the majority of accounts in this category were projected to not save vs. the Utility's "Price to Compare"; some of these accounts will be re-bid. See further explanations below on Page 3 and Page 4.
- ** Bid Pricing Option #8 was not awarded because these accounts were awarded under Pricing Options 6 and 7, respectively.
- "BGS-CIEP" stands for Basic Generation Service – Commercial and Industrial Energy Pricing. These are the "PRIMARY-Service" accounts, and belong to only the largest energy users in the State. [In the entire SJPC, these are the only entities with this type of account: PSE&G: Camden County, Gloucester County, CCMUA, GCUA, Camden County College, Gloucester County College, Gloucester County Vocational-Technical School District and Borough of Collingswood. ACE: Camden County College, Gloucester County College and Gloucester County Vocational-Technical School]. All others are Secondary-Service.
- "BGS-FP" stands for Basic Generation Service – Fixed Priced. These are the "SECONDARY-Service" accounts. Within this FP Category, every participant's accounts have been categorized even further (generally, according to whether the service is for a Facility or whether it is for Street Lighting).
- Supply versus Delivery. Please be reminded that the rates above are not inclusive of delivery charges from your local utility company. The utility delivery rates are regulated, and will typically be in the range of \$0.025-0.045/kWh. This delivery rate should be added to the rates above to determine an "all-in" electric rate.
- Billing. For the accounts included in this bid, you may now receive 2 separate bills for service; one from the utility and one from the energy supplier (Hess) that was the successful bidder for each respective account category.

2.0 BID DISCUSSION: BACKGROUND, SAVINGS PROJECTIONS, MARKET CONDITIONS, ETC.

SJPC Background:

From 2004 - 2009, the SJPC's bids for retail electric service included only Primary-service electric accounts; this is due to both their (hourly, market-priced) default rate structure as well as to penalties for not switching to a retail energy provider for service. For all other ("Secondary") electric accounts (which means the vast majority of SJPC participants), the least-cost option for electric service was to remain with the utility and receive default service [called Basic Generation Service ("BGS"); this is also commonly referred to as a customer's "Price to Compare"]. For most of the time since the inception of deregulation in 2003, retail market prices had not fallen to a point that would enable energy suppliers to offer savings versus the BGS; however, this condition changed in late 2008 and has continued into 2013.

When the opportunity for savings for Secondary-service accounts became apparent, the SJPC's program was expanded to include other local government entities within the SJPC counties. With the last 2 bid processes, we have further expanded the program to include all secondary accounts (even street lighting). Our goal for all participants with secondary accounts is to secure fixed rates that are lower than the utility's BGS rates.

The SJPC bids continue to include the larger, Primary-service accounts; the goal for these accounts is to secure the lowest possible fixed rates to achieve budget certainty and longer-term rate stability. These Primary accounts also make our bid package very attractive to suppliers. The SJPC has accomplished these goals and has generated substantial savings for all participants.

A Note about Future Savings: BGS Rates are falling. It should be noted that, each February, our State's four (4) electric utility companies conduct an auction process to secure wholesale power supply to serve all customers in New Jersey that receive BGS service (see www.bgs-auction.com for more information). The results of the auction process dictate the BGS rates that go into effect each June 1; our State's BGS rates are set and re-set every year. Over the past few years, the BGS rates have trended downward; therefore, the savings opportunity represented by the gap between the BGS default utility price and the current retail market price has closed for some types of accounts. Many accounts (PSE&G Secondary-service accounts, for

instance) are already projected not to save versus the BGS Price to Compare; this is why this account category was not awarded in this recent bid process.

Account/Meter Categories, Product and Term:

Delivery locations for Participating Members in the SJPC span two electric utility service territories, PSE&G and Atlantic City Electric (ACE). Therefore, we must categorize our bid pricing by Utility Service Provider, as well as by each Utility's various rate classifications. These categories are outlined below:

Atlantic City Electric (ACE) Service Territory:

1. Primary accounts: Rate Classes AGS-Primary, MGS-Primary, accounts > 500 kW
2. Secondary accounts: Rate Classes AGS, MGS and DDC (mostly facilities)
3. Secondary accounts: Rate Classes SPL and CSL (mostly outdoor/street lighting)

Public Service Electric & Gas (PSE&G) Service Territory:

1. Primary accounts, Rate Classes LPL-P, HTS, LPLS > 500 kW
2. Secondary accounts, Rate Classes GLP, LPL-S (mostly facilities)
3. Secondary accounts, Rate Classes BPL, PSAL (mostly outdoor/street lighting)

Most SJPC Participating Entities have electric accounts that fall into more than one category.

For all account categories, we requested all-inclusive fixed pricing for a 12 and 24-month period. The service ending date for all accounts is intended to be uniform (June 2015).

Complete Bid Response Summary (including options not awarded) and Bid Award:

A total of five (5) energy suppliers responded to the initial bid package: Hess Corporation, South Jersey Energy, Reliant Energy, Constellation New Energy and Champion Energy. Hess Corporation was the lowest responsible bidder for all pricing categories.

PSE&G Secondary (Facility) Accounts NOT Awarded: The reason that the PSE&G Secondary-service Facility accounts (Rate Classes GLP and LPL-S) were not awarded is because the low bid rate was not lower than the Class Average Price-to-Compare for this category. These PSE&G Facility accounts are currently being served by SJE under their original contract, and will continue to be served at their existing bid rate until the June 2013 meter read. This category of accounts is being re-bid in June. Our goal is to generate savings for at least some of the accounts that fall within this category for a period of up to 24 months

Performance and Projected Savings:

PRIMARY-Service Accounts

As compared to the SJPC's last bid for Primary-Service Accounts (conducted on October 10, 2011); the rates secured in this bid process are 13% lower for PSE&G Primary accounts for the CCMUA and Camden County Corrections, 5% lower for all other PSE&G Primary accounts (Camden and Gloucester County, GCUA, etc.) and 2.4% higher for ACE Primary accounts. Below please find a comparison of bid prices and a summary of projected savings by Participant. Projected savings herein are based on contract rate-over-contract rate.

SECONDARY-Service Accounts

As stated above, the SJPC's goal for Secondary-Service Accounts is to achieve savings versus the Utility's Price to Compare. In order to determine whether a particular group of accounts is projected to achieve savings, we utilize the "class average" Price to Compare for the respective rate classes included in that category. However, please note that each account actually has its own, specific Price to Compare, which factors in the operating characteristics of the account. So, while the projections are based on the low bid rate versus the "class average" benchmark, actual savings are going to vary by account.

INSTRUCTIONS TO CALCULATE SAVINGS: If needed, this table can be used as a reference to calculate savings. This can be done by cross-referencing the corresponding rate class on the utility bill with this table herein.

For Example: an account in Atlantic City Electric territory with rate class Monthly General Service or Annual General Service has a new rate at \$0.0849 per kWh. The price to compare rate is \$0.10113 per kWh. The savings per kWh is \$0.0162. Taking the annual electric consumption in kilowatt-hours (i.e. 10,000 kWh) and multiplying by the savings per kWh (\$0.0162) generates the estimated annual savings (\$1,620 per year).

Below is our bid summary for the SECONDARY rate categories, which includes a column with the "Class Average" Price to Compare.

For an Entity-specific projection of anticipated cost savings under this contract, you may contact Shawn Tejani Dome-Tech directly or send an email request to s_tejani@dome-tech.com.

Projected Savings for SECONDARY-Service Accounts

Atlantic City Electric:

- Facility accounts are projected to save 16% versus the Class-Average PTC.
- Outdoor/Street Lighting accounts are projected to save 34% versus the Class-Average PTC

PSE&G:

- Facility accounts will be re-bid (low bid rate was not lower than the Class-Average PTC).
- Outdoor/Street Lighting accounts are projected to save 8% versus the Class-Average PTC.

Additional Information

ACE Facility accounts were awarded to Hess Corporation for service start in June 2013 for 24 months; therefore, facility accounts in ACE territory will continue service with Hess at the new lower rate of \$0.0849/kWh. As compared to the SJPC's last bid for Secondary-service accounts, the new rates have decreased by approximately 2.3%.

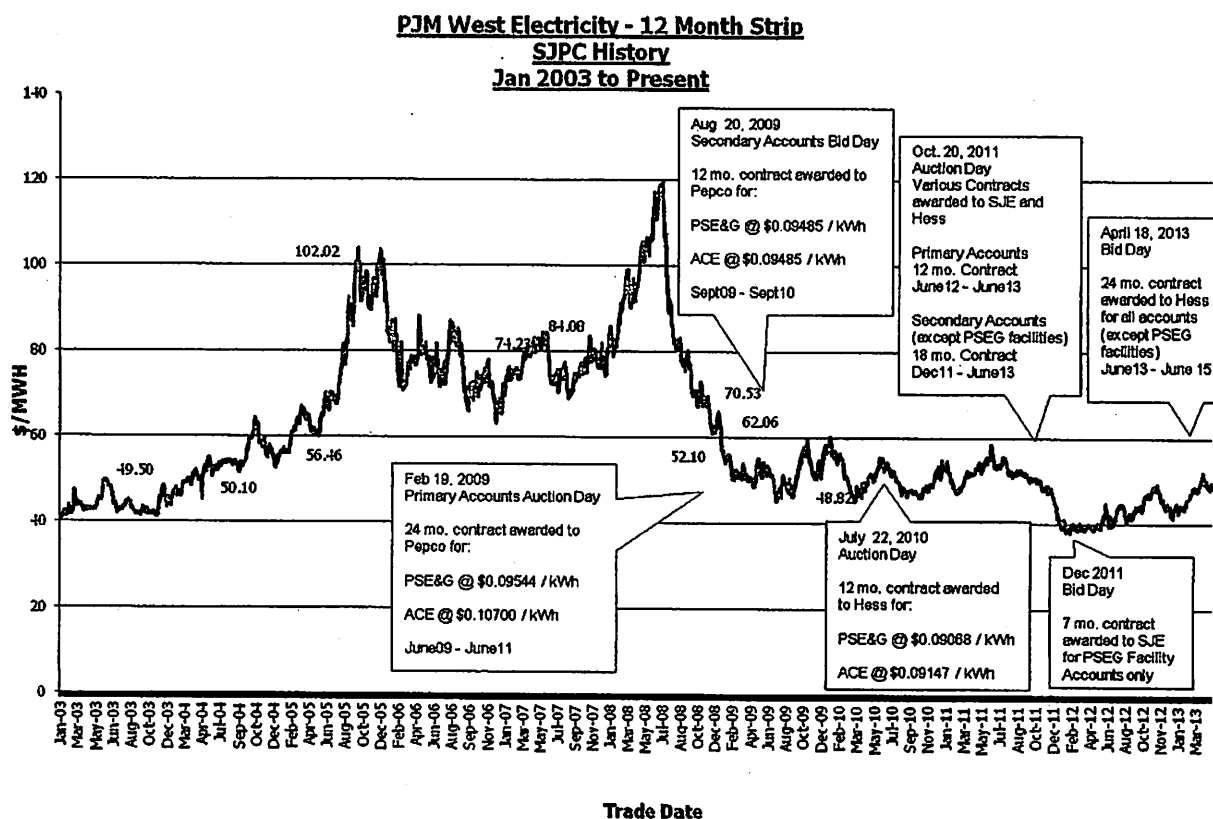

ACE Street Lighting accounts were awarded to Hess Corporation for service start in June 2013 for 24 months; therefore, these accounts in ACE territory will switch service providers from SJE to Hess at the new lower rate of \$0.0525/kWh. As compared to the SJPC's last bid for these Secondary-service accounts, the new rates have decreased by approximately 12.5%.

PSE&G Street Lighting accounts were awarded to Hess Corporation for a service start in June 2013 for 24 months; therefore, these accounts in PSE&G territory will continue service with Hess at the new lower rate of \$0.05290/kWh. As compared to the SJPC's last bid for these Secondary-service accounts, the new rates have decreased by approximately 14.6%.

PSE&G Facility Accounts were not awarded due to savings versus Price to Compare and the explanation provided above on Page 4. These accounts will remain with South Jersey Energy until the June 2013 meter read date and then return to service with PSE&G. The SJPC plans to re-bid a portion of these accounts that are most likely to save versus the utility default rate. This contract will most likely start with the July or August meter read date.

Energy Market Conditions and SJPC Bid History:

Below please find a graph that shows the last several years' worth of market settlement prices for electricity. The graph shows the average closing prices of a rolling 12-month period of energy futures prices. The graph is representative of the commodity, alone; it does not include any of the additional supply/generation components (capacity, transmission, losses, ancillary services, etc.) that comprise a retail energy price. It is intended to provide an indication of the level of pricing that a particular customer might expect to see, but the graphs do not account for the specific load profile of any individual energy user. We have noted the SJPC's recent electric bid history herein.

Ongoing Contract Support and Budget Assistance:

Throughout the course of this contract, you may contact Dome-Tech for assistance with contract questions, budgeting assistance, billing issues, or general energy-related questions.
