

Addendum for application: James Maga

1-13-26

2513 Herbert Dr. Northfield NJ 08225

Block 27, lot 36

1. The addendum is for a C variance to be added to the application for the carport that had a previous variance for the left side set back of 6' and I am proposing 5.14' setback after a new survey revealed different measurements.
2. The addendum is for a C variance to be added to the application for the addition on the primary structure. R-1 zone requires 25' setback on the rear side of primary structure and I am proposing 17.79'
3. The addendum is for a C variance to be added to the application for the 254sf accessory building. Addendum is to change application:
Side-the proposed 7' setback changed to 6.44' setback after new survey was completed.
Rear-the proposed 4' setback changed to 2.4' setback after new survey was completed
Height- the proposed 13.5' down to 12.4' which is measuring to the top cross tie. Therefor, it goes passed the permitted 12' requirement by 0.4'

A handwritten signature in black ink that reads "James P. Maga". The signature is fluid and cursive, with "James" on the first line and "P. Maga" on the second line.

James Maga
